Des shareholdes and business patnes,

In our report on the first half of 2016 I described to you the changes that our market faces. During the period under review some of these developments started to leave traces.

Examples of this include the strong demand from regions such as the United States and Latin America, which now account for almost a quarter of our new orders. This trend is being driven by our ability to offer a substantially wider product range and to address a larger customer base compared with the "old" Nordex.

At the same time, we are on the verge of the transition phase ahead of a tendering process in our domestic German market. This is motivating our customers in the short term to award contracts for projects remunerated under the old system.

Order intake increased to a good EUR 840 million in the third quarter. We are expecting a substantially larger volume in the current quarter, with the aforementioned markets set to play an important role. This year, our business is being dominated by the fourth quarter to an unusually strong degree. This, of course, is exerting pressure on our entire organisation. At the same time, however, it places us in a good position to achieve our full-year business target for 2016.

All in all, I am satisfied with our performance in the first three quarters of 2016. And I am confident that we will be able to overcome the challenges facing us and reach our full-year targets as this is largely in our own hands.

You may possibly also be wondering about the long-term outlook. Obviously, a projection over several years into the future is much less certain. Yet, one event has strengthened my confidence in the growing importance of our industry: the Paris international climate protection treaty took effect on 4 November. The next step is now to implement specific measures. This will be good for our environment. And it will also be good for our business.

Yours sincerely,

Lars Bondo Krogsgaard Chief Executive Officer

Nordex SE

Industry conditions

Sector analysts forecast very strong growth in renewable energies in the medium and long term particularly given that the Paris climate protection agreement came into effect at the beginning of November 2016. This prompted the International Energy Agency (IEA) to raise its outlook for the sector at the end of October. Consequently, it now expects the share of renewable production technologies in total electricity production to widen from 23% in 2015 to 28% by 2021. In addition to the substantial decline in costs, it has identified heightened political support in countries such as the United States, China, India and Mexico as the reasons for this.

In a study published at the end of September 2016, market researcher MAKE Consulting assumes that new installations in the European onshore wind sector will reach 12.1 GW (including repowering) in 2016. New onshore installations look set to decline by 6% to 11.4 GW in 2017, with rising volumes in Eastern and Southern Europe unable to fully offset contraction in Northern Europe. Looking ahead over the following years through to 2025, annual new installations are also expected to remain at a high level of between around 10 GW and 12 GW.

In the North American onshore market, MAKE projects new installations of 9.5 GW this year and 8.5 GW in 2017, while figures well in excess of 10 GW are expected for the years from 2018 to 2020. Annual installations in Latin America are estimated at around 4.5 GW in 2016 and 2017, with slight annual growth expected in the following years. MAKE also projects stable to slightly increasing new onshore installations in the forecast period until 2025 in India and South Africa, two individual markets of importance to Nordex. Annual new installations are expected to come to between 3 GW and 4 GW in India and between 550 MW and 800 MW in South Africa.

Business performance

Since the second quarter of 2016, Nordex has had two reportable segments - "Projects" and "Service" - in line with the changed internal reporting system following the acquisition of Acciona Windpower. Prior to this, segment reporting had been based on regions.

Segment overview

	Projects		Service		Group	
	01.01	01.01	01.01	01.01.–	01.01.–	01.01.–

¹Before consolidation

Operating performance indicators

Order intake in the Projects segment was valued at EUR 841.0 million in the third quarter of 2016 (previous year: EUR 610.5 million). Of this, Nordex brand products accounted for EUR 606.2 million and AW brand products for EUR 234.8 million. Nordex thus recorded order intake of EUR 2,168.8 million in the first nine months of 2016, equivalent to an increase of 10.4% over the previous year (EUR 1,964.0 million). Adjusted for the AW brand turbines of EUR 655.8 million, order intake declined by 23.0%. This was primarily due to the fact that no major contracts comparable to those gained in the previous year were awarded for Nordex brand turbines.

Around one third of the orders received in the first three quarters of 2016 came from Germany (EUR 741.2 million or 34.2%), while the United States was the second largest individual market (EUR 204.5 million and 9.4%, respectively). It was followed by Finland with new turbine orders of EUR 195.8 million or 9.0% of the total. At EUR 193.8 million, Turkey made a similar contribution, with France accounting for EUR 158.4 million. All told, the greatest share of new orders in the Project segment came to EUR 1,645.6 million or 75.9% of the total. In North and South America, new orders worth a total of EUR 523.2 million were generated in the United States, Brazil, Mexico and Peru. With the project in Peru, in which 42 AW wind power systems are to be installed, the Nordex Group entered a new market in Latin America.

Measured in terms of megawatts, 34% of orders were for Generation Gamma and 30% for Generation Delta wind power systems in the first three quarters of 2016. The proportion of AW brand 3MW turbines in order intake stands at 36%.

Firm orders in Nordex's Projects segment were valued at EUR 2,090.4 million as of 30 September 2016 (30 September 2015: EUR 1,791.2 million). Of these, the Nordex brand accounted for EUR 1,370.4 million and the AW brand for EUR 720.0 million. The book-to-bill ratio in the Projects segment came to 1.00 as of 30 September 2016.

Order backlog of current contracts in the Service segment stood at EUR 1.594 million as of 30 September 2016. For the first time, the order backlog of current contracts for AW turbines was included in this number (EUR 341 million as of 30 September 2016). New orders equalled EUR 424.1 million in the first nine months of 2016.

India	12.0 ²	_	_	-
Total	1,943.5	1,538.9	480	261

¹Q2 and Q3 2016 only

²production commenced in August

Installed capacity	01.01	01.01.–	Change
	30.09.2016	30.09.2015	%
	MW	MW	
EMEA	1,483.5	1,038.0	+42.9
North and South America	541.2	119.9	+>100
Total	2,024.7	1,157.9	+74.9

In the first three quarters of 2016, the Nordex Group produced turbines with a total nominal output of 1,943.5 MW (previous year: 1,538.9 MW). Turbine production output in Germany came to 1,619.5 MW, translating into organic growth of 5.2% over the same period in the previous year. The plants operated by Acciona Windpower, which has been consolidated since the second quarter of 2016, in Spain, Brazil and India registered an output of 324 MW.

In the first three quarters of 2016, the Nordex Group produced a total of 480 rotor blades (previous year: 261), equivalent to 160 sets, in its own plants. The Spanish blade production facility in Lumbier, which was consolidated from the second quarter, contributed 93 rotor blades. Organic growth, i.e. the increase in production output at the blade facility in Rostock, came to 48.3%, underpinned in particular by efficiency gains in the production of the NR 65.5 series.

In the first nine months of 2016, Nordex installed 764 wind power systems with a combined capacity of 2,024.7 MW (previous year: 1,157.9 MW) for customers in 13 countries. 73% of the new installations were in EMEA and 27% in North and South America (by MW). In the third quarter on its own, most installations were in Germany, Mexico, the United States and Brazil.

¹Excluding investment in the acquisition of Acciona Windpower

²On the basis of a weighted average of 91.380 million shares (2015: 80.882 million shares)

In the first three quarters of 2016, the Nordex Group registered consolidated sales of EUR 2,339.5 million, equivalent to an increase of 31.0% over the end of the same period in the previous year (EUR 1,786.1 million). This reflects the Nordex Group's increased activities on a like-for-like basis as well as the contribution made by Acciona Windpower, which was consolidated on April 1, 2016 for the first time. Adjusted for consolidation effects, the Nordex Group achieved organic growth of 10.6% in the first three quarters of the current year.

The Projects segment contributed sales of EUR 2,162.7 million (previous year: EUR 1,647.5 million), while the Service segment registered sales of EUR 188.7 million (previous year: EUR 148.0 million), thus accounting for around 8.0% of total sales (before consolidation in both cases).

The gross margin came to 24.4% in the first three quarters of the current year, widening by 3.1 percentage points over the previous year's figure of 21.3%. This favourable performance was due to improved productivity and efficiency gains in project execution. The structural cost ratio (includes personnel expenses and other operating income net of other operating expenses) rose from 13.6% to 15.7% for consolidation-related reasons. Earnings before interest, taxes, depreciation and amortisation (EBITDA) came to EUR 203.9 million in the first three quarters of 2016, equivalent to 8.7% of sales (previous year: EUR 138.1 million, or 7.7%). After depreciation and amortisation expense of EUR 78.1 million, which included effects of EUR 23.4 million from purchase price allocation in connection with the acquisition of Acciona Windpower, earnings before interest and taxes (EBIT) came to EUR 125.8 million, marking an increase of 28.9% over the previous year (EUR 97.6 million). In the first three quarters of 2016, Nordex generated consolidated net profit of EUR 64.4 million, an increase of 41.9% over the previous year's figure of EUR 45.4 million.

The working capital ratio came to 6.8% as of 30 September 2016 (31 December 2015: -1.2%). This particularly reflects the work commenced on projects in the order backlog and efforts to secure an order pipeline in the United States via "safe harbour" projects. US customers wishing to make use of a production tax credit (PTC) for a project at the rate applicable in 2016 must commence work on the project by the end of 2016. This entails purchasing the necessary components at a value of around 5% of the total project value.

In addition to a cash outflow from the change in working capital, investments in the acquisition of Acciona Windpower (cash component of EUR 333 million) in the first nine months of 2016 resulted in negative free cash of EUR 498.8 million, reversing the positive free cash flow of EUR 18.5 million recorded in the same period of the previous year.

As of 30 September 2016, Nordex had cash and cash equivalents of EUR 431 million, with net debt standing at EUR 217 million (31 December 2015: net liquidity of EUR 322 million). The equity ratio stood at 32.1% as of the end of the quarter, up from 31.2% at the end of 2015.

Outlook

In the course of the year, delays arose in individual orders. As it should be possible to offset these effects through new orders in the fourth quarter, Nordex reaffirms its order intake target of over EUR 3.4 billion.

As a result of these delays, reported sales in 2016 will be somewhat lower than originally planned. This is also the main reason why we now project sales at the lower end of the previously defined range of EUR 3.35 - 3.45 billion. Accordingly, the Management Board now forecasts full-year sales of around EUR 3.35 billion in 2016.

This will also have a volume effect on the EBITDA margin. In addition, the greater proportion of projects in the emerging markets in the current quarter with somewhat lower margins will cause the full-year EBITDA margin to shrink. Accordingly, Nordex projects an EBITDA margin for 2016 of around 8.3%.

The working capital ratio should drop to below 5% at the end of the fourth quarter due to the expected large order intake and related prepayments.

Capital spending will increase by around EUR 10 million over the previous outlook to as much as EUR 100 million. This is attributable to the funding for the extensions to Nordex's head office in Hamburg which no longer offers sufficient space for all corporate functions. Thus, all Nordex employees are to work in a single building complex again in around two years' time. The funding for this project is based on a sale-and-lease-back transaction to be completed in 2017.

Material events after the end of the quarter

No events of particular importance affecting the Nordex Group's net assets, financial condition and results of operation occurred after the end of the first nine months of 2016.

The interim review and the interim financial statements have not been audited or reviewed by independent auditors.

Disclaimer

This interim management report contains forward-looking statements which refer to general economic trends as well as the Nordex Group's business performance and its net assets, financial condition and results of operations. Forward-looking statements are not statements describing past facts and may be used in connection with words such as "believe", "estimate", "anticipate", "plan", "predict", "may", "hope", "can", "will", "should", "expect", "intend", "is designed to", "with the intent", "potential" and similar terms. Forward-looking statements are based on the Company's current plans, estimates, forecasts and expectations and are therefore subject to risks and uncertainty, as a result of which actual performance or the income and sales achieved may differ significantly from the trends, income or sales expressly or implicitly reflected in the forward-looking statements. Readers of this interim management report are expressly asked to note that they should not place any undue confidence in these forward-looking statements, which are valid only as of the date of this interim management report. Nordex SE does not intend to and assumes no obligation to update the forward-looking statements.
