LETTER TO THE SHAREHOLDERS

José Luis Blanco
Chief Executive Officer

*Dear Shareholders, Business Partners
and Friends of the Company,*

We began 2021 with high installation volumes and adapted fully to the requirements of the pandemic, which continues to affect our activities. Although our main business processes are running smoothly due to the various measures we introduced, particularly in production and installation, their efficiency is still compromised and there are some delays, albeit to nowhere near the same extent as last year.

The growth prospects for the global wind industry remain positive. They have also been boosted by recent political developments such as the European Green Deal, the realignment of US climate policy, and Germany's new climate targets, the latter of which now aim to reduce greenhouse gas emissions by 65 percent by 2030 compared to 1990 levels instead of the previous target of 55 percent. We were again encouraged by our order intake trend in the first three months of 2021, particularly in light of the cautious start to the year across the entire industry. The Nordex Group received orders for 279 wind turbines with a nominal output of more than 1.2 gigawatts, with 73 percent of these orders attributable to the Delta4000 range. In addition, the new N155 and N163 rotor blade models are now increasingly being deployed.

During the first quarter of 2021, we increased our sales from EUR 965 million in the same quarter last year to EUR 1.25 billion and recorded earnings before interest, taxes, depreciation and amortization (EBITDA) of EUR 10.4 million after EUR 13.1 million in the prior-year period. This resulted in an EBITDA margin of 0.8 percent, which we expected in light of the current environment and the still noticeable impact of the pandemic on our business. In addition, a larger number of lower-margin projects were still being implemented during the first quarter of 2021.

At this point, I would once again like to mention an event that provided us with joy and motivation in equal measure: Nordex's shares were admitted to the Deutsche Börse's MDAX on 22 March 2021 – coinciding almost exactly with our 20th anniversary as a listed company. The 60 stocks of the MDAX index for medium-sized listed companies follow on directly from Germany's leading DAX index, which includes the country's 30 largest stocks. This means that Nordex SE is one of the 90 most important listed companies in Germany. The admission of our shares was largely due to the increase in market capitalization resulting from the share price rise as well as a high level of liquidity (the number of shares traded each day).

Overall, we anticipate positive business performance and an improvement in the quality of our financial key performance indicators, based on our stabilized supply chain, the quality of our order intake and the results of the corporate program we launched last year. We also believe that the global progress in coronavirus vaccinations will have an increasingly positive impact on efforts to contain the pandemic. In light of this, we are confirming our guidance for 2021.

We as the Nordex team will tackle this year's many challenges with plenty of enthusiasm, commitment and motivation to ensure that the Company continues to develop in line with our strategy.

Thank you for placing your trust in our work.

Kind regards,

José Luis Blanco

Chief Executive Officer

GROUP INTERIM MANAGEMENT REPORT

for the period ended 31 March 2021

SECTOR ENVIRONMENT

The wind energy sector continues to operate within an environment with fundamentally intact and positive medium and long-term demand as well as the operational challenges posed by the coronavirus pandemic, which are impacting the supply chain in particular. Although this has largely stabilized at present, it could be adversely affected once again by the increasingly critical pandemic situation in India, for example. The pandemic with its direct and indirect effects thus remains the biggest element of uncertainty for the wind industry in the current year. At the same time, the virtual climate summit initiated by the US government in April 2021 and the agreement reached by EU bodies to set tougher targets for reducing CO₂ by 2030 illustrate how climate protection is once again becoming a more prominent issue on the international agenda, with environmentally-friendly energy production a key element of this discussion.

As a result, there have been no fundamental deviations from the sector environment presented in the 2020 Annual Report.

BUSINESS PERFORMANCE

The Nordex Group further increased the number of installed wind turbines and recorded significant sales growth due to high activity levels in the first quarter of 2021 compared to the prior-year quarter. However, earnings fell short of the figure recorded for the first three months of 2020, when the effects of the coronavirus pandemic had not yet begun to have an impact on key financial figures. Although the Group's business processes are largely running smoothly due to the countermeasures introduced, their efficiency continues to be compromised. In addition, a large number of lower-margin projects were still being implemented during the first quarter. However, project margins will steadily increase for the remainder of the year as wind farms based on Delta4000 turbines begin to dominate installations. This shift represents a key driver in the expected improvement in profitability.

Customer demand, particularly from Europe, remained strong in the first three months of 2021, reaching a volume of 1.2 GW without any exceptional large projects thanks to wind turbines in the Delta4000 series.

NEW ORDERS

Although the Nordex Group's order intake continued to show an encouraging trend in the first quarter of 2021, it did not reach the same levels as the very strong prior-year quarter, which was dominated by a major project in Norway. In the Projects segment, the Nordex Group received orders valued at a total of EUR 910.8 million (Q1 2020: EUR 1,184.6 million) for turbines with a combined nominal output totaling 1,247.5 MW (Q1 2020: 1,643.9 MW). The average selling price (ASP) per megawatt of output was EUR 0.73 million/MW, slightly higher than the ASP for the full year 2020 of EUR 0.70 million/MW. The Group received orders from 11 countries in total, with Europe accounting for 92% and Latin America for 8%; the largest individual markets were Spain, Turkey, Germany and Finland (in MW). The Delta4000 series comprised 73% of the turbines ordered during the first quarter. The high figure of 85% recorded in the same quarter last year was also influenced by the choice of Delta4000 turbines for the aforementioned major project in Norway.

The order book of the Projects segment as of 31 March 2021 amounted to EUR 5,090.6 million, down 12.5% from the prior-year quarter (Q1 2020: EUR 5,819.9 million). At 68%, Europe accounted for the majority of the order book. A share of 16% was attributable to Latin America, 12% to North America, and 4% to the Rest of the World. The book-to-bill ratio (the ratio of order intake to sales recognized in the Projects segment) stood at 0.79 for the first quarter of 2021 (Q1 2020: 1.37).

In the first quarter of 2021, the Nordex Group's Service segment received orders valued at EUR 108.0 million, a year-on-year decrease of 22.5% (Q1 2020: EUR 139.4 million). The order book of the Service segment as of 31 March 2021 amounted to EUR 2,837.2 million, up 8.1% from the prior-year reporting date (31 March 2020: EUR 2,624.5 million). As of the reporting date, the Nordex Group's service organization serviced 8,558 wind turbines with a nominal output of 22.6 GW (31 March 2020: 8,054 wind turbines with a combined output of 20.6 GW).

With the installation figures up on the prior-year quarter, the Nordex Group's consolidated sales also increased by 29.7% to EUR 1,251.2 million in the first quarter of 2021 (Q1 2020: EUR 964.6 million). Sales in the Projects segment rose by 32.8% to EUR 1,145.7 million (Q1 2020: EUR 862.6 million), while sales in the Service segment grew by 5.9% to EUR 108.0 million (Q1 2020: EUR 102.0 million). The Service segment's contribution to overall sales was 8.6% in the reporting period.

Gross revenue increased at a rate of 9.7% to EUR 1,120.9 million in the first quarter of 2021 (Q1 2020: EUR 1,021.5 million), with inventories built up in preparation for the sharp increase in installations reduced further. Gross profit (gross revenue less cost of materials) rose by 38.2% to EUR 216.0 million (Q1 2020: EUR 156.3 million). Structural costs (staff costs and net other operating income/expenses) increased considerably by 43.6% to EUR 205.6 million (Q1 2020: EUR 143.2 million). Net other operating income/expenses amounted to EUR -87.7 million (Q1 2020: EUR -65.5 million), while staff costs increased to EUR 118.0 million (Q1 2020: EUR 89.7 million).

Earnings before interest, taxes, depreciation and amortization (EBITDA) in the first quarter of 2021 thus came to EUR 10.4 million (Q1 2020: EUR 13.1 million). The EBITDA margin was 0.8% (Q1 2020: 1.4%). Depreciation and amortization totaled EUR 38.4 million in the reporting period (Q1 2020: EUR 36.8 million). Of this total, EUR 5.4 million (Q1 2020: EUR 7.2 million) is attributable to depreciation and amortization arising from the purchase price allocation (PPA) in connection with the acquisition of Acciona Windpower.

The Nordex Group generated earnings before interest and taxes (EBIT) amounting to EUR -28.1 million in the first quarter of 2021 (Q1 2020: EUR -23.7 million). This corresponds to an EBIT margin of -2.2% (Q1 2020: -2.5%) or -1.8% when adjusted for PPA depreciation and amortization (Q1 2020: -1.7%). Excluding unallocated income and expenses, EBIT in the reporting period was EUR 0.7 million in the Projects segment (Q1 2020: EUR 3.1 million) and EUR 17.8 million in the Service segment (Q1 2020: EUR 18.4 million) during the reporting period.

The financial result for the first quarter of 2021 was EUR –27.1 million (Q1 2020: EUR –17.8 million). It was impacted by the revolving credit facility signed in August 2020, among others. The income tax result was positive again at EUR 0.5 million (Q1 2020: EUR 3.6 million). This resulted in a consolidated net loss of EUR 54.7 million for the first quarter of 2021 (Q1 2020: consolidated net loss of EUR 38.0 million). Earnings per share (EPS) came to EUR –0.47 (Q1 2020: EUR –0.36).

Successful working capital management enabled Nordex to keep the working capital ratio stable at –7.6% as at 31 March 2021 compared with the prior-year reporting date (31 March 2020: –7.5%). This also significantly improved operating cash flow to EUR 45.5 million in the reporting period (Q1 2020: EUR –21.8 million). As in the previous year, cash flow from investing activities amounted to EUR –35.1 million (Q1 2020: EUR –35.1 million). The Group thus generated free cash flow of EUR 10.4 million in the first quarter of 2021 (Q1 2020: EUR –56.9 million).

In total, financial liabilities were repaid in the first three months of 2021, and cash flow from financing activities amounted to EUR –45.9 million (Q1 2020: EUR –6.7 million). As of 31 March 2021, the Nordex Group's cash and cash equivalents totaled EUR 742.5 million (31 December 2020: EUR 778.4 million). Net debt (liabilities to banks, and bond, shareholder loan and employee bond less cash and cash equivalents) decreased to EUR 33.2 million at the end of the first quarter of 2021 (31 December 2020: EUR 156.4 million).

Compared with the end of the previous year, total assets fell by 3.0% to EUR 4,277.0 million as of 31 March 2021 (31 December 2020: EUR 4,410.1 million). Assets side were mainly affected by the reduction in inventories, whereas equity and liabilities saw a stronger decrease in current liabilities to banks than the increase in other non-current financial liabilities triggered by the inclusion of the shareholder loan. Equity also decreased by 10.4% to EUR 693.4 million compared with the end of 2020 (31 December 2020: EUR 773.5 million) as a result of the consolidated net loss. The equity ratio narrowed to 16.2% as a result of the lower equity at the reporting date of 31 March 2021 (31 December 2020: 17.5%).

At EUR 38.6 million, capital expenditure (CAPEX) of the Nordex Group in the first three months of 2021 matched the level of the prior-year quarter (Q1 2020: EUR 37.3 million). Investments in property, plant and equipment at EUR 31.3 million were almost unchanged, whereas additions to intangible fixed assets were slightly higher at EUR 7.3 million. CAPEX focused on rotor blade production, especially in India, and the procurement of installation and transport equipment.

EMPLOYEES

The number of employees was 8,393 as of 31 March 2021 (31 March 2020: 7,496 employees). As this job growth was primarily attributable to higher business and production volumes, it was focused on various mainly production and project-related departments as well as the services business.

OPPORTUNITIES AND RISKS

No opportunities or risks affecting the business performance of the Nordex Group in 2021 arose in the first quarter of 2021 that deviate materially from the opportunities and risks presented in the 2020 Annual Report.

GUIDANCE

The Nordex Group anticipates positive business performance for 2021 and an improvement in the quality of financial key performance indicators. The coronavirus pandemic is only expected to have a limited impact on the Company. This is primarily contingent on a stabilized supply chain and successful strategies enabling the Company to work effectively and efficiently even under pandemic conditions. It is also assumed that the pandemic will have a significantly lower impact on economic activity over the course of the year due in particular to international progress in rolling out coronavirus vaccination programs.

The guidance for the 2021 financial year published on 23 March 2021 with the 2020 Annual Report aims for consolidated sales of EUR 4.7 billion to EUR 5.2 billion and an EBITDA margin of 4.0% to 5.5%. The working capital ratio is predicted to be below minus 6% at the end of 2021. Capital expenditures totaling around EUR 180 million are planned for 2021.

In addition to this guidance for the current 2021 financial year, the Nordex Group has the strategic objective of achieving sales of around EUR 5 billion in the short term and a consolidated EBITDA margin of 8% by financial year 2022, based on a production capacity of over 6GW.

EVENTS AFTER THE END OF THE REPORTING PERIOD

No significant events after the end of the reporting period are known to the Group.

The present interim report for the quarter ended 31 March 2021 (Group interim management report and condensed interim consolidated financial statements) was neither audited nor reviewed by an auditor.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

for the interim period from 1 January to 31 March 2021

ACCOUNTING POLICIES

BASIS OF PREPARATION

These unaudited and unreviewed condensed interim consolidated financial statements of Nordex SE and its subsidiaries for the first three months of 2021 were prepared in accordance with the International Financial Reporting Standards (IFRSs) issued by the International Accounting Standards Board (IASB) as applicable in the European Union. All IFRSs and interpretations applicable as of 31 March 2021 have been observed, in particular IAS 34 Interim Financial Reporting.

These interim consolidated financial statements should be read in conjunction with the consolidated financial statements for the 2020 financial year. The accounting policies contained in the consolidated financial statements as of 31 December 2020 also apply to the interim consolidated financial statements as of March 31, 2021, unless explicit reference is made to changes. For more information on the applied accounting policies, see the consolidated notes for the financial year from 1 January to 31 December 2020. The consolidated financial statements for the financial year from 1 January to 31 December 2020 are available on the Internet at www.nordex-online.com under Investor Relations.

The business results for the first three months of 2021 are not necessarily indicative of the results expected for the year as a whole. Expenses incurred irregularly during the financial year have only been recognized or accrued in the interim consolidated financial statements to the extent that such recognition or accrual would also be appropriate at the end of the financial year.

Sales rose to EUR 1,254,160 thousand in the first quarter of 2021, up from EUR 964,600 thousand in the prior-year period. At EUR 10,371 thousand, EBITDA was down slightly on the year-earlier level of EUR 13,085 thousand, giving an EBITDA margin of 0.8% (1 January to 31 March 2020:

1.4%). The sales growth is mainly attributable to a substantial increase in the number of installations. However, the EBITDA margin fell short of the prior-year figure, which had not yet been impacted by the pandemic. As a result of the measures Nordex has taken, business processes are essentially stable, though some are still experiencing delays or a reduction in efficiency. In addition, a large proportion of lower-margin existing projects were still being executed in the first quarter of 2021.

The Nordex Group again increased its installation output in the first quarter of 2021, building 356 wind turbines in 20 countries with a total output of 1,400 MW. In the opening three months of the previous year, 269 wind turbines with an aggregate output of 899 MW were built in 21 countries. In terms of installed capacity (in MW), 57% was attributable to Europe, 21% to North America, 16% to Latin America and 6% to the Rest of the World. This lifted sales in the Projects segments from EUR 862,623 thousand in the prior-year quarter to EUR 1,145,741 thousand in the reporting period. The Service segment continued its growth trajectory with an 5.9% increase in sales to EUR 107,967 thousand (1 January to 31 March 2020: EUR 102,018 thousand).

Amounting to EUR 4,277,009 thousand as at 31 March 2021, total assets decreased slightly by 3.0% compared with year-end 2020. The equity ratio came to 16.2% (31 December 2020: 17.5%). At the end of March 2021, the Nordex Group had cash and cash equivalents of EUR 742,507 thousand (31 December 2020: EUR 778,357 thousand). Net debt was further reduced from EUR 40,911 thousand at the close of 2020 to EUR 33,246 thousand at the end of March (31 March 2020: EUR 156,397 thousand). At -7.6%, the working capital ratio as a percentage of consolidated sales was on a level with the previous year (31 March 2020: -7.5%).

The wind energy industry continues to operate in an environment consisting of a fundamentally intact, favorable demand situation in the medium and long term, amid operational challenges stemming from the coronavirus pandemic, which are especially apparent at the level of the supply chain. Although now largely stable once more, this could be disrupted again by the increasingly critical COVID-19 situation in India, for instance. The pandemic with its direct and indirect effects thus remains the biggest element of uncertainty for the wind industry in the current year.

The loan was paid out in two tranches of EUR 17,200 thousand in August 2020 and EUR 215,000 thousand in March 2021. The loan runs until 30 April 2025 at an interest rate of 10.0%. The shareholder loan secures refinancing of the EUR 215,000 thousand promissory note due in April 2021. As at 31 March 2021, the liability including accrued costs and interest recognized under financial liabilities amounted to EUR 217,320 thousand (31 December 2020: EUR 953 thousand).

Research and development loan

In addition, Nordex has been granted a long-term research and development facility of up to EUR 100,000 thousand by the European Investment Bank. Nordex intends to use this loan to finance the development of increasingly more efficient technical solutions to additionally extend its competitive lead. The loan has a term of eight years from the date on which it is drawn and is repaid in installments. The borrower is Nordex Energy SE & Co. KG, with the main Nordex Group companies holding joint and several liability. As at 31 March 2021, the liability including accrued interest recognized under liabilities to banks amounted to EUR 34,426 thousand (31 December 2020: EUR 40,982 thousand).

Employee bond

To strengthen employee loyalty while allowing them to make a profitable investment, the Nordex Group has launched a participation program for its employees in the French Val aux Moines wind farm developed and implemented by Nordex. Employees can participate by purchasing bonds issued by Nordex Employee Holding GmbH. The total volume is up to EUR 4,000 thousand with an annual interest rate of 6.0%. The term runs from 1 October 2020 to 30 September 2024. ¹ formerly Nordex Energy GmbH, Hamburg

Revolving credit facility

To protect it from the effects of the COVID-19 pandemic, on 4 August 2020 the Nordex Group, via Nordex SE and with main Nordex Group companies holding joint and several liability, received a revolving credit facility for EUR 350,000 thousand under the German federal government's loan guarantee program with the participation of the states of Mecklenburg-West Pomerania and Hamburg. Ninety percent of the credit facility is guaranteed by the Federal Republic of Germany, the City of Hamburg and the State of Mecklenburg-West Pomerania. The credit facility runs until 30 April 2022 and carries interest at up to 2.0% above Euribor, which is capped at zero (Euribor floor). As at 31 March 2021, the liability including accrued interest recognized under liabilities to banks amounted to EUR 0 thousand (31 December 2020: EUR 250,743 thousand).

All financings are unsecured and, in principal, equal in rank. However, the shareholder loan is subordinated.

Under the revolving credit facility, the covenant concept of the research and development loan and the syndicated multi-currency guarantee facility was successfully adjusted to the current business performance. A minimum liquidity level has been agreed upon, compliance with which must be reported to the respective banks on a monthly basis. As at 31 March 2021, the monthly minimum liquidity level was met in each case. The other covenants (equity ratio, leverage and interest coverage ratio) will come into force again in September 2021. Nordex expects to be in compliance with all covenants in the future as well. The banks may only terminate the facilities for good cause, which includes breach of the covenants.

NOTES TO THE INCOME STATEMENT

(21) SALES

Sales comprise income from the completion of construction contracts for customers, the sale of wind power systems and income from service contracts.

In the case of project contracts, sales are recognized either at a point in time using the milestone method or over time using the cost-to-cost method, depending on the respective scope of the contract.

Sales for standardized turbine types are recognized at a point in time when control of the fully operational turbine is transferred to the customer. Control is deemed to have been transferred at the time the turbine is fully erected. Costs are recognized in inventories until sales are recognized at a point in time.

Sales for customer-specific installations for which there is no alternative use and for which there is an enforceable right to payment for the service provided are recognized over time.

The sales generated from service contracts will be recognized over time and distributed across the years covered by the contract in line with a distribution of costs typical of the contract (schedule). The schedule for determining the degree of completion of individual service contracts is based on historical data. A contract asset (liability) for service contracts is recognized to the extent the degree of completion exceeds (falls below) the amount billed.
