LETTER TO THE SHAREHOLDERS

JOSÉ LUIS BLANCO
Chief Executive
Officer

*Dear Shareholders
and Business Partners,*

Our sector is becoming increasingly established as a market with a promising outlook and long-term growth prospects. Wind energy is holding its ground as the most cost-effective source of power in many markets and will become increasingly efficient thanks to our continuous efforts. Despite this, the aftereffects of the shift in our industry are still being felt in the form of fierce competition with pressure on prices – even though this systemic change to auctions is now complete in most markets. Against this backdrop, market volumes have been recovering in line with expectations.

As a result, Nordex posted over two gigawatts of incoming orders in the first half of 2018, helped by the global positioning of our company. While the order situation in the wind energy sector in our home market of Germany continued to stagnate, Nordex secured the Company's largest-ever individual order of 595 megawatts in Brazil and received an order for over 147 megawatts in South Africa. There were also new orders from Mexico, the USA, France, Sweden and Turkey, to name just a few.

Nevertheless, our sales, earnings and turbine production remained below the previous year's levels in the first half of 2018 – as set out in our forecasts. We are still expecting a stronger second half of the year in 2018.

We are also working hard to make Nordex fit for the future. The further development of the Company and our cost savings are proceeding as planned. Moreover we have received the first order intake of our Delta4000 platform by the end of June. The prototype works as planned and we see nice volumes of this highly efficient wind turbine in recent and new permits in Germany. Designed to be extremely flexible with maximum profitability, this product range sustainably reduces the cost of energy, thus increasing the likelihood of success in tendering processes.

In summary, while we expect 2018 and 2019 to remain challenging, we are well prepared to face those challenges. Thank you for your confidence in our work.

Yours sincerely,

José Luis Blanco
Chief Executive Officer

NORDEX SHARES

Nordex SE's stock price largely stabilized in the first two quarters of 2018 despite uncertainty generated by global trade restrictions and political unrest. On the last trading day of the first half of the year (29 June 2018), Nordex stock closed at EUR 8.70 in XETRA trading, just shy of the year-end 2017 price (29 December 2017: EUR 8.87). This resulted in a market capitalization of EUR 843.7 million at the end of the first six months.

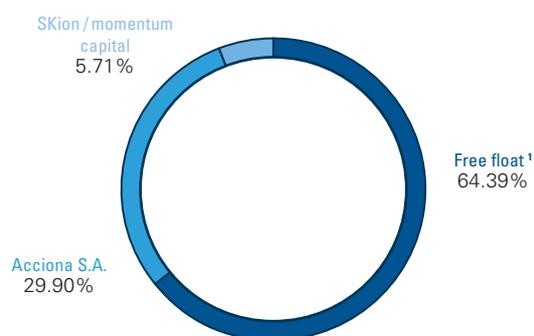

The global stock index RENIXX for renewable energy companies, on which Nordex is listed, slipped 3.6% to 446 points in the first half of 2018 (29 December 2017: 463 points). The TecDAX, Germany's technology index, which is the most important benchmark for Nordex shares, gained 6.4%, reaching 2,691 points at the end of the first six months of 2018 (29 December 2017: 2,529 points).

The shareholder structure comprises the strategic anchor shareholder Acciona S.A., which continues to hold an interest of 29.9%, and the SKion/momentum investor group with an unchanged share of 5.71%. Of the remaining shares, no investor holds a share above the reporting threshold of 3%.

GROUP INTERIM MANAGEMENT REPORT

FOR THE PERIOD ENDED 30 JUNE 2018

SECTOR ENVIRONMENT

The competitive landscape in the wind industry has not changed considerably since the end of 2017. Most wind energy production capacity is allocated using auction systems or tenders, with the transition from feed-in tariffs to auction systems having been more or less completed in the majority of markets. This market situation creates intense competition along with the corresponding pressure on tariffs paid to power plant operators and on the price of wind turbines. In the first six months of 2018, as had been generally expected, the tendered volume increased again compared with the previous year. Overall, the information on the sector-specific environment presented in the 2017 Annual Report continues to be valid for the most part.

In Germany, new capacity of wind turbines installed onshore decreased in the first half of 2018 in line with expectations. According to VDMA Power Systems and the German Wind Energy Association (BWE), turbines with gross capacity of 1,626 MW were installed. This represents a year-on-year decline in gross new capacity installed of 29% compared with the prior-year figure of 2,281 MW. For the year as a whole, the industry associations are forecasting an increase in onshore installed capacity of 3.3 to 3.5 GW, which contrasts with an average increase of around 4.6 GW between 2014

and 2017. The market slump can be attributed to the design of the tendering system. According to figures published by WindEurope, a total of 3,333 MW of new onshore wind energy capacity was installed in Europe in the first six months of 2018, down from 6.1 GW in the prior-year period. Alongside Germany, new capacity installations were concentrated in France, Denmark and Turkey. For the year as a whole, WindEurope anticipates new onshore installed capacity of 10.2 GW.

BUSINESS PERFORMANCE

In the first half of the 2018 financial year, the Nordex Group's business performance met internal expectations, leading the Company to believe that it is well on track to achieve its full-year targets in line with forecasts. Accordingly, sales and earnings for the first six months of 2018 were down significantly year-on-year. The installations planned for the second half will have a positive effect on sales performance up until the end of the year. The EBITDA margin for the first half of 2018 reached the target range for the year as a whole. The Nordex Group's order intake in the second quarter matched that for the successful first quarter, due in particular to large-scale projects in Latin America, bringing new business in the first half of the year to around 2.1 GW.

Segment reporting has already been adjusted in the financial statements for the first quarter of 2018 in order to improve its informative value and enhance comparability with peers in the industry. Sales, income and expenses that cannot be clearly allocated to the "Projects" or "Service" segments are reported separately as "Not allocated." The complete segment reporting can be found in the notes to the financial statements starting on page 26. The prior-year figures were adjusted to reflect the new presentation.

Sales from 1 January to 30 June 2018 were determined in accordance with the IFRS 15 financial reporting standard, which has been effective since 1 January 2018, whereas sales for the prior-year period (1 January to 30 June 2017) were determined in accordance with IAS 11. Additional information is available in note (21) to the financial statements and in the 2017 Annual Report.

NEW ORDERS

In the first six months of 2018, the Nordex Group landed new confirmed orders valued at EUR 1,613.9 million (H1 2017: EUR 904.6 million) in the Projects segment. The nominal output of the turbines commissioned was 2,097.3 MW (H1 2017: 933.0 MW). Latin America accounted for the lion's share of the orders from a total of 14 countries at 52%, followed by Europe (36%), the "Rest of the world" region (7%) and North America (5%). The largest individual markets were Brazil, France and South Africa. In the second quarter of 2018, the Nordex Group secured the largest-ever individual order in the history of the Company with the "Lagoa dos Ventos" project in Brazil for the customer Enel Green Power. Starting in fall 2019, a total of 191 wind turbines with aggregate output of around 595 MW will be delivered for the planned wind farm. Other key markets in the first six months of 2018 were Sweden, Turkey, Spain and the United States. As expected, the domestic market of Germany supplied only a comparatively low order volume due to the current market situation. Nevertheless, it was here that Nordex received its first order for the new Delta4000 turbine platform.

At the end of June 2018, the Nordex Group had a confirmed order book in the Projects segment of EUR 3,187.1 million, compared with EUR 1,742.4 million as at 30 June 2017. Alongside the high order intake level amid comparatively low sales in the first six months of 2018, the first-time application of the new IFRS 15 accounting standard significantly affected these figures. Europe accounted for 41% of the order book, Latin America for 34% and North America for 16%. The "Rest of the world" reporting segment, which principally comprises orders in South Africa, accounted for 9%.

The book-to-bill ratio (ratio of order intake to sales recognized in the Projects segment) stood at 2.02 for the first half of 2018 (H1 2017: 0.67). This figure is an indicator of future growth.

In the first six months of 2018, the Nordex Group received new orders in the Service segment totaling EUR 217.0 million (H1 2017: EUR 98.1 million; in the previous year: exclusively extensions of existing contracts). The order book in the Service segment amounted to EUR 2,044.8 million as at 30 June 2018 (30 June 2017: EUR 1,864.0 million). At the reporting date, the Service segment serviced 6,945 wind turbines worldwide with total installed capacity of 16.7 GW (30 June 2017: 14.2 GW).

PRODUCTION AND INSTALLATION

Production output

| Production | Turbines (MW) | | Rotor blades (units) | |
|--------------|----------------|----------------|----------------------|------------|
| | H1 2018 | H1 2017 | H1 2018 | H1 2017 |

| India | 18.0 | 3.0 | — | — |
| Total | 1,140.5 | 1,536.0 | 444 | 426 |

The Nordex Group produced 368 turbines (H1 2017: 535 turbines) with a nominal output totaling 1,140.5 MW (H1 2017: 1,536.0 MW) in the first six months of 2018. Of these, 177 were Gamma and Delta turbines manufactured in Germany. The plants in Spain, Brazil and India assembled 191 AW3000 turbines. The Nordex Group's rotor blade plants in Germany and Spain together manufactured 444 rotor blades in the reporting period.

(H1 2017: 426 rotor blades). The slight increase year-on-year is attributable to a considerable rise in production in Spain. Rotor blade production in Germany was impacted by a decrease in the production of Gamma and Delta turbines and the shift to manufacturing the new type NR74.5 rotor blades for the N149/4.0-4.5 turbine on the Delta4000 platform.

In the first half of 2018, the Nordex Group installed a total of 303 turbines with a nominal output totaling 934.4 MW in 13 countries (H1 2017: 1,128.6 MW). Around half (51%) of the newly installed turbines are in Europe. Other areas of focus are Latin America with approximately one-third (32%) and Australia ("Rest of the world" reporting region: 15%). In addition, turbines were installed in the United States in the second quarter for the first time in the current financial year (North America: 2%). Activities here will increase significantly in the second half of the year.

¹ excluding impairment losses from purchase price allocation (PPA) for Acciona Windpower

² based on a weighted average of 96.982 million shares (previous year: 96.982 million shares)

The Nordex Group's sales in the first six months of 2018 amounted to EUR 957.1 million, down 36.2% from the prior-year period (H1 2017: EUR 1,501.1 million). Sales performance met internal expectations for the first half of the year. The decline mainly reflected lower levels of activity as a consequence of the comparatively low order intake in 2017. The effect of the new IFRS 15 accounting standard on revenue recognition is also evident here. Under IAS 11, the standard that was still applicable for 2017, sales would have been higher (see "Notes to the Income Statement").

In the first half of 2018, the Projects segment generated sales of EUR 797.1 million (H1 2017: EUR 1,356.5 million), a decline of 41.2% from the prior-year period. In the first six months of 2018, the Service segment lifted sales by 7.7% to EUR 161.8 million (H1 2017: EUR 150.2 million). This brought the service business's contribution to consolidated sales in the first six months of 2018 to around 17%.

Gross profit (gross revenue less cost of materials) decreased by 25.8% to EUR 307.2 million in the first six months of 2018 (H1 2017: EUR 414.2 million). Structural costs (staff costs and net other operating income/expenses) fell by 9.4% from the prior-year period to EUR 268.8 million (H1 2017: EUR 296.7 million).

Earnings before interest, taxes, depreciation and amortization (EBITDA) therefore declined by 67.3% in the first half of 2018 to EUR 38.4 million (H1 2017: EUR 117.5 million). The EBITDA margin fell to 4.0% compared with 7.8% in the first half of 2017. Depreciation, amortization and impairment losses totaled EUR 74.2 million in the reporting period (H1 2017: EUR 68.1 million). Of this total, EUR 30.0 million (H1 2017: EUR 24.4 million) can be traced back to impairment losses arising from the purchase price allocation (PPA) in connection with the acquisition of Acciona Windpower. Before interest and taxes, Nordex generated EBIT of EUR -35.8 million in the six-month reporting period (H1 2017: EUR 49.4 million), representing an EBIT margin of -3.7% (H1 2017: 3.3%). Adjusted for the PPA impairment losses, the EBIT margin dropped to -0.6% in the quarter under review (H1 2017: 4.9%).

In the Projects segment, the Nordex Group's earnings before interest and taxes (EBIT) decreased to EUR 54.9 million in the first half of 2018 (H1 2017: EUR 152.7 million), with an EBIT margin of 6.9% (H1 2017: 11.3%). EBIT in the Service segment increased at the same time from EUR 18.8 million in the prior-year period to EUR 28.3 million, with a margin of 17.5% (H1 2017: 12.5%).

The financial result in the reporting period stood at EUR -18.2 million (H1 2017: EUR -14.5 million) and reflects the refinancing at the beginning of the current financial year. With a positive net tax figure of EUR 13.8 million, the Nordex Group generated a consolidated loss of EUR 40.3 million in the first half of 2018 in contrast to a consolidated profit of EUR 22.6 million in the prior-year period. Earnings per share (EPS) therefore amounted to EUR -0.42 in the reporting period (H1 2017: EUR 0.23).

The working capital ratio increased slightly during the year to 5.8% as at 30 June 2018, but was substantially lower than the figure at the end of the first half of 2017 (30 June 2017: 9.8%). In the first six months of 2018, operating cash flow was EUR -92.8 million (H1 2017: EUR -160.0 million), while cash flow from investing activities totaled EUR -9.0 million (H1 2017: EUR -75.7 million). Free cash flow in the reporting period improved to EUR -101.7 million as against EUR -235.7 million in H1 2017.

As at 30 June 2018, the Nordex Group had cash and cash equivalents of EUR 484.2 million (31 December 2017: EUR 623.2 million). Net debt as at 30 June 2018 amounted to EUR 174.0 million (31 December 2017: EUR 60.1 million).

In the first six months of 2018, total assets increased considerably by 14.8% compared with the end of 2017 to EUR 3,223.1 million (31 December 2017: EUR 2,807.6 million). This was mainly due to the effects of the first-time application of the IFRS 15 financial reporting standard, which led to an increase in inventories and other current non-financial liabilities.

The effects of the first-time application of IFRS 15 and the consolidated loss caused equity to decline to EUR 746.0 million as at 30 June 2018 (31 December 2017: EUR 919.0 million). The equity ratio was down to 23.1% as of 30 June 2018 on account of the increase in total assets and reduction in equity after amounting to 32.7% as of 31 December 2017.

The Group reduced capital expenditure (CAPEX) by 40.5% from the prior-year period to EUR 41.7 million (H1 2017: EUR 70.1 million). Investments in property, plant and equipment totaled EUR 22.2 million and additions to intangible assets amounted to EUR 19.5 million, including EUR 17.8 million in capitalized R&D expenses. In addition to product development, capital expenditure was concentrated on the manufacturing plants in Spain, India and Germany.

EMPLOYEES

As of the 30 June 2018 reporting date, the Nordex Group had a total of 5,261 employees (30 June 2017: 5,255 employees). Whereas the Service segment and production in Brazil added employees, the workforce was recently reduced, particularly at the Hamburg and Rostock sites, as part of the “45-by-18” cost-cutting program. Some of the affected employees are still included in the employee statistics as staff on garden leave.

OPPORTUNITIES AND RISKS

In the first six months of 2018, no opportunities or risks affecting the business performance of the Nordex Group in the 2018 financial year arose that deviated materially from the opportunities and risks presented in the 2017 Annual Report.

OUTLOOK

The Nordex Group confirms its guidance for financial year 2018. The figures for the first six months are in line with the Group’s internal planning. For the second half of the year, sales are anticipated to increase, reflecting rising installation numbers. In accordance with the outlook for the current financial year published at the end of March 2018, Nordex projects sales of between EUR 2.4 billion and EUR 2.6 billion, with an EBITDA margin between 4% and 5%. The Group aims for a working capital ratio of under 5% as of the end of 2018. Capital expenditure totaling EUR 110 million is planned.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE INTERIM PERIOD
FROM 1 JANUARY TO 30 JUNE 2018

ACCOUNTING POLICIES

BASIS OF PREPARATION

These unaudited and unreviewed condensed interim consolidated financial statements of Nordex SE and its subsidiaries for the first six months of 2018 were prepared in accordance with the International Financial Reporting Standards (IFRSs) issued by the International Accounting Standards Board (IASB) as applicable in the European Union. All IFRSs and interpretations applicable as of 30 June 2018 have been observed, in particular IAS 34 Interim Financial Reporting.

These interim consolidated financial statements should be read in conjunction with the consolidated financial statements for the 2017 financial year. The accounting policies contained in the consolidated financial statements as of 31 December 2017 also apply to the interim consolidated financial statements as of 30 June 2018, unless explicit reference is made to changes. For more information on the applied accounting policies, see the consolidated notes for the financial year from 1 January to 31 December 2017. The consolidated financial statements for the financial year from 1 January to 31 December 2017 are available on the Internet at www.nordex-online.com under Investor Relations.

The business results for the first six months of 2018 are not necessarily indicative of the results expected for the year as a whole. Expenses incurred irregularly during the financial year have only been recognized or accrued in the interim consolidated financial statements to the extent that such recognition or accrual would also be appropriate at the end of the financial year.

EFFECTS OF NEW FINANCIAL REPORTING STANDARDS

Since 1 January 2018, Nordex has applied both IFRS 9 Financial Instruments and IFRS 15 Revenue from Contracts with Customers.

The application of IFRS 9 introducing the expected credit loss model did not result in additional impairments of receivables due to the collateralization of financial assets with guarantees, sureties and standby letters of credit as of 30 June 2018.

For other effects, please see the disclosures in the consolidated notes for the financial year from 1 January to 31 December 2017.

During the financial year, two contracts to deliver and assemble wind power systems in Chile and the United States amounting to EUR 134,219 thousand (1 January to 30 June 2017: EUR 47,997 thousand) were won by Acciona Energia Chile S.A. and Acciona Energy USA Global LLC.

In addition, the Nordex Group holds a 75% interest in natcon7 GmbH, which is therefore a non-consolidated affiliated company.

In 2014, Supervisory Board member Jan Klatten indirectly acquired an interest of 44.20% in the Polish wind farm company C&C Wind Sp. z o.o. in a market-wide tender process. The Nordex Group holds a 40.00% share of this company. Accordingly, C&C Wind Sp. z o.o. is classed as an associated company. As in the previous year, there were no business transactions with Mr. Klatten or Nordex companies attributable to him.

In addition, the shares in GN Renewable Investments S.à r.l. (30.00%) are also classified as an associate.

The balances and transactions with these companies are set out in the following table:
