Nordex Group’s highly efficient wind power systems are making a major contribution to climate-friendly energy generation today. Our new Sustainability Strategy 2025 clearly signals that the Nordex Group is prepared to do its part to fight climate change.
Around 60 million tonnes of CO₂e were saved worldwide last year thanks to the Nordex Group’s wind turbines. […]

The global energy transition is what drives and motivates the Nordex Group every day. Now that we have reached the milestones in our Sustainability Strategy 2019 to 2021, including switching our own electricity consumption to 100% renewable energy, we are looking farther into the future. Our new Strategy 2025 will focus even more on key levers, especially:

› further reducing carbon emissions
› continuously improving our progressive corporate culture
› further strengthening ethical standards in our supply chain
› optimizing our products for the long term

[...]

Hamburg, March 2022
The development, manufacturing, project management, and servicing of wind turbines in the onshore sector is the core competence and passion of the Nordex Group and its more than 8,600 employees around the globe. Founded in 1985, we have more than 35 years of experience in harnessing the wind. Our comprehensive product portfolio focuses on onshore turbines in the 4 to 6.X MW+ class, offering solutions for markets with limited space and regions with limited grid capacities. Our Delta4000 series, the first in the world to introduce a flexible rating as part of its core design philosophy and operational strategy, features high-yield wind turbines that enable many years of efficient electricity generation from wind energy in almost all geographical and climatic conditions. Check out our company facts.

€ 5,444.0 million  
Sales Revenues 2021  
(2020: EUR 4,650.7 million)

8,658 employees in 2021 at the reporting date  
(2020: 8,527 employees)

60 Mt of CO₂e emissions avoided  
(2020: 46.1 Mt CO₂e avoided)

38.8 GW of wind energy capacity in over 40 countries by 2021  
(2020: 32 GW in over 40 countries)
SUSTAINABILITY HIGHLIGHTS 2021
Special projects fostering and representing sustainability performance

Sustainability Strategy 2025
› Focuses on 7 topics underpinned by ‘smart’ targets and specific measures
› ‘Together for change – Wind for a sustainable future’ serves as our compass and reflects our integrative approach: Let’s work together on implementing the measures to achieve our targets – and contribute to a future worth living!

SBTi commitment and path to climate neutrality
› The goal: to become climate-neutral (scopes 1 and 2) by 2023
› Commitment to the Science Based Targets initiative (SBTi), which entails the definition of science-based targets (SBTs) in line with the global 1.5°C target in 2022

Stakeholder Roundtable
› Video conference held with various customers, suppliers, and one investor as part of the materiality analysis
› Helped to highlight common sustainability interests, created and raised awareness of stakeholder requirements

Global Alliance for Sustainable Energy
› Aiming to ensure that renewables are wholly sustainable for people and the planet, it leads the just transition away from fossil fuels
› Bringing together partners with a shared vision for the sustainability of the renewables industry and the need to take concrete, collaborative action
› The Nordex Group among 17 founding members

Establishment of a Diversity and Inclusion (D&I) Council
› Diversity at the Nordex Group: people from 90 nations, different backgrounds, and different age groups
› Tasks of the D&I Council: empowering women and underrepresented employees, developing measures, and tracking performance in fulfilling our vision of diversity and inclusion

EcoVadis Gold Standard
› Awarded to the Nordex Group in recognition of our successful sustainability efforts
› New position: Top 3% of all general industrial machinery manufacturers assessed by EcoVadis

Learn more about D&I at the Nordex Group
NORDEX SUSTAINABILITY RATINGS
(As of December 2021)

There are various ESG\textsuperscript{1} rating agencies that continuously monitor and confirm Nordex’s sustainability performance. The agencies collect information on these topics, conduct research and evaluate companies. These ratings encourage transparency concerning sustainability performance in our industry.

<table>
<thead>
<tr>

OUR SUSTAINABILITY CONTRIBUTION
In the reporting year we developed the Nordex Sustainability Strategy 2025 in an integrative process involving our most relevant internal and external stakeholders.

The new strategy, entitled ‘Together for change – Wind for a sustainable future’, serves as our compass and reflects our integrative approach:
Let’s work together on implementing the measures to achieve our targets – and contribute to a future worth living.

The strategy provides the foundation for our actions and includes our core sustainability topics from 2022 onwards. The Nordex Group has summarized these in 7 strategic key topics within the four dimensions of “Our Products”, “Environment”, “Social” and “Governance”, and has set itself specific, measurable goals (see next page).

We have set specific objectives for these topics to launch the next stage of consistent sustainable development in our Company in line with Sustainable Development Goals of the United Nations (SDGs).

SUSTAINABLE DEVELOPMENT GOALS (SDGs)

The UN Agenda 2030 adopted 17 global Sustainable Development Goals (SDGs) in 2015. The Nordex Group is committed to the goal of sustainable development and actively contributes to the SDGs. Our focus SDGs are:

7 | Affordable and Clean Energy
As a supplier of innovative onshore wind turbines we make a sustainable contribution to steadily increasing the share of renewable energies in the global energy mix.

8 | Decent Work and Economic Growth
The Nordex Group generated a direct economic value of 5,440.0 EUR million and employed more than 8,600 people in 2021. By operating sites in Brazil, India, Mexico and South Africa, we create jobs for the local population in emerging markets.

9 | Industry, Innovation and Infrastructure
With our business model (manufacture of clean and environmentally sound technologies) we contribute to SDG 9 by promoting sustainable industrialization.

12 | Responsible Consumption and Production
The Nordex Group exerts a positive impact on SDG 12 since the production of wind turbines supports the energy transition towards renewable energies while respecting sustainable production and consumption patterns along their life cycle.

13 | Climate Action
With our product portfolio we contribute to the promotion of greener energy generation on a global level. Within the Company, we switched to 100% green electricity procurement in 2021 and will develop and define science-based targets (SBTs) in 2022.

Our business activities make an important contribution.
Providing a sustainable product is the backbone of our business-model. Over the past years, we already reduced the carbon footprint of our wind turbines. For 2022, we plan to continue this path and have set ambitious goals on our agenda for further improving product sustainability.

### Main Targets

Sustainable Products

Material Mix of foundation and Delta4000 Turbine (in %)
Concrete, steel and glass/carbon fiber reinforced composites are the three main materials of all Nordex turbines.

Our turbines’ carbon footprint:
CO₂e emissions related to the generation of one kilowatt-hour of electricity

6.5 g CO₂e are emitted per kWh electricity generated. This is shown by the life cycle assessment (LCA) of a wind farm with Delta4000 turbines.

- 75.1 Foundation
- 93.0 Cement
- 7.0 Steel
- 24.9 Delta4000 turbine (tower, nacelle, blades)

87.0 Steel
9.1 Glass and carbon composites
1.5 Plastics
0.6 Operating fluids
0.5 Aluminum
0.5 Electrics/electronics
0.4 Copper
0.4 Other

75.1 Foundation
93.0 Cement
7.0 Steel
24.9 Delta4000 turbine (tower, nacelle, blades)

6.68 GW installed Capacity 2021
(2020: 5.46 GW)

60 Mt of CO₂e emissions avoided through all Nordex turbines running in 2021
(2020: 46 Mt CO₂e avoided)

85% – 95% of materials used in a wind turbine are recyclable

4.4 satisfaction rate in the Sale and Services areas in 2021 (scale 1-6, 6=best)
(2020: 4.4, only Sales)
The Nordex Group’s products help to drive the energy transition and avoid large amounts of GHG emissions. We aim to further improve our environmental impact by increasing energy and water efficiency, embracing biodiversity, and cutting GHG emissions and waste wherever we can.

Further Information
Page 46ff., 55ff., SR 2021
Climate Change & Decarbonization

Our commitment

- Since 2021, we procure 100% of the electricity we consume from renewable sources, primarily from wind- and solar PV-based green electricity products, power purchase agreements and unbundled energy attribute certificates
- We will set near- and long-term science-based targets (SBTs) in 2022

Energy consumption by installed capacity in kWh/MW (2020: 20,634 kWh/MW)

Greenhouse Gas emissions (scopes 1 & 2) by installed capacity in kg CO₂/MW (2020: 4,135 kg CO₂/MW)

Our commitment

- Since 2021, we procure 100% of the electricity we consume from renewable sources, primarily from wind- and solar PV-based green electricity products, power purchase agreements and unbundled energy attribute certificates
- We will set near- and long-term science-based targets (SBTs) in 2022

100% Green electricity procurement in 2021

Further Information about Environmental Data Page 8f., 47ff., SR 2021

-13% energy consumption by installed capacity (2020 to 2021)

-46% GHG emissions in our own operations by installed capacity (2020 to 2021)

1 In the graph (Greenhouse Gas Emissions in t) we only show our scope 1 and 2 emissions. For our comprehensive report on scope 3 emissions see the Corporate Carbon Footprint analysis of 2020 (see following page).

Nordex SE
Key Facts of Sustainability 2021
Corporate Carbon Footprint Analysis of 2020 (in kt CO₂e)

- Purchased goods and services: 2,627 kt CO₂e
- Capital goods: 61 kt CO₂e
- Fuel- and energy-related activities: 4 kt CO₂e
- Upstream transportation and distribution: 140 kt CO₂e
- Waste generated in operations: 2 kt CO₂e
- Business travel: 9 kt CO₂e
- Employee commuting: 1 kt CO₂e
- Use of sold products: 343 kt CO₂e
- End-of-life treatment of sold products: 182 kt CO₂e

Total greenhouse gas emissions: 3,396 kt CO₂e

Scope 1: 24
Scope 2: 2
Scope 3: 3,370

Our efforts

› By developing, producing, selling, and installing wind turbines, we contribute to the renewable energy transition.

› We quantify the Corporate Carbon Footprint (CCF) on an annual basis, using it as a foundation for managing our own impact on the climate.

› The CCF includes all greenhouse gas emissions that are directly and indirectly caused by the Nordex Group along the whole value chain.

› This analysis covered all production, office, and service premises across the Group regardless of their size, as well as all relevant emissions categories of the scopes 1, 2, and 3 that are classified in the GHG Protocol Corporate Standard.

Scope 4
46,100 kt CO₂e
emissions avoided through all Nordex turbines running in 2020
Environmental Protection

**Waste production**

-37% waste volume by installed capacity (2020 to 2021)

**Water withdrawal**

-7% water withdrawal by installed capacity (2020 to 2021)

---

**Biodiversity Protection**

The Nordex Group seeks to protect biodiversity by avoiding, mitigating, and addressing any significant negative impacts our products and services might have on the natural environment. We aim to identify initiatives that can have a positive impact on biodiversity as a way to offset potential biodiversity loss.

---

1 At the Nordex Group, “recovery” includes preparation for reuse, recycling and composting.
We provide fair and attractive working conditions and a progressive company culture. At #TeamNordex, our values of integrity, respect, collegiality, and ownership are at the forefront. In 2021, we improved our occupational health and safety and set new targets to enhance mental health, diversity and inclusion, and employee development.

<table>

</tr>
</tbody>
</table>

Further Information
Page 65ff., 80ff., SR 2021
Fair & Attractive Employer

- 8,658 employees (2020: 8,527)
- 17.1% share of women in management (2020: 16%)
- 90 nationalities working at Nordex (2020: 86)
- 3,595 employees took part in a Compass Dialog (2020: 3,526)
- 8,749 e-learning courses completed (2020: 5,497)
- 2,355 new onboardings (2020: 3,008)
- 5,895 employees attended Technical Training Center courses (2020: 3,054)
Occupational Health & Safety

In 2021, we continued several measures to reach our goal of reducing our LTIF to below 3.5 and create a safe working environment for all our employees and partners.

**Preventive Culture leadership**

Programs are based on the early detection of “unsafe acts” and positive reinforcement of “safe acts” by the workers and leaders at each plant.

**“Take your time to ...”**

This campaign revolved around the five life-saving rules for electrical work and used various severe accidents that have happened in the past as examples.

**360° HSE Transformation program**

With the 360° HSE Transformation program Nordex aims to become a world-class company in terms of HSE by ensuring safe on-site practices during projects.

**5S and Lean Manufacturing Programs**

have achieved great results, with an approximated 15% reduction in accidents (accidents/hour) in the moulding and finishing area.

### Key Facts of Sustainability 2021

| 3.2 | Lost Time Injury Frequency (LTIF) – Group level  
(2020: 3.9) |
| --- | --- |
| 8 | Significant Employee Accidents – Group level  
(2020: 3) |
Corporate Social Engagement
We consider Corporate Social Engagement as an opportunity to contribute to regional development and engage as a member of the local community in regions where we operate.

Socio-Economic Development Project (SED)
We are involved in various development initiatives promoted by the Nordex Education Trust and the SED.

› 4 major topic areas: youth development, promotion of women, early childhood education, and the support of disabled persons.
› Main aims of SED: helping young entrepreneurs to develop in all subject areas and supporting the beneficiaries in achieving economic independence.
› Assessing most urgent needs and targets through the SED program with regular direct communication with communities.

Wind Turbine technical workshop for women
We believe in the importance of actively empowering women in the energy business by increasing their technical knowledge.

› Our aim: breaking down professional stereotypes and remove inhibitions.
› The project: Creation of a wind turbine technical workshop for women studying energy or electrical engineering at universities.
› Official partner: Turkish Wind Energy Association and Turkish Women in Renewables and Energy.

Turkish: Nordex’s Educational Projects (2 examples)
We aim to share our knowledge with people, and we want to inspire young people with wind energy technology.

› Project 1: Publication of a book on wind energy technology for students who are interested in the wind industry.
› Project 2: Organization of a contest for 100 young and enthusiastic vocational school students in Izmir; presentation of ideas in the field of wind energy by vocational students; winners receive an introduction to wind training and opportunity for an internship at Nordex Enerji A.S. Turkey.

Socio-Economic Development project, South Africa
Responsibility is at the core of our business. In line with our Sustainability Strategy 2025, we set goals to engage with and positively impact our supply chain, ensure responsible and ethical business conduct as well as take ESG-oriented business decisions.

Further Information
Page 90ff., 98ff., SR 2021
Nordex engages in Wind Europe’s working group ‘Sustainability in the Supply Chain’ and aims to further improve sustainable supply chain standards in the wind energy sector.
Business Ethics, Compliance and Integrity
Our Values: Integrity, Respect, Colleagueship and Ownership

The Code of Conduct for Nordex employees comprises the following five core principles:

1. Compliance with applicable Law
2. Avoiding conflicts of interest
3. Protecting Company property
4. Upholding the Code of Conduct
5. Aspiring towards ethical standards

All of our industrial workers have also been required to complete an e-learning course on preventing corruption once every two years.

4,774 employees completed a course on preventing corruption in 2021 (2020: 3,358)

48 compliance inquiries in 2021 (2020: 51)

Aiming high: The currently largest Nordex wind turbine reaches a height of up to 245.5 meters at the rotor blade tip.
Insights of the sustainability employee survey

In order to anchor sustainability more firmly in the company, we strengthened various measures for internal sustainability communication.

An example: Our extensive employee survey, which evaluated employee communication on sustainability issues, was carried out as part of our strategy development process.

Participants of the employee survey

969 employees >27 departments 29 countries (workplace)

How would you rate your level of knowledge regarding the Nordex Group’s sustainability activities?

- Very good: 25%
- Good: 38%
- Acceptable: 4%
- Poor: 5%
- Very poor: 5%

How important is it for you personally to work for a company that contributes to climate protection and sustainable development with its business model?

- Very important: 52%
- Important: 38%
- Moderately important: 2%
- Slightly important: 1%
- Not important: 0%
- I don’t know: 7%

How well prepared is your department for sustainability-related challenges?

- Very good / good: 39%
- Acceptable: 15%
- Poor / very poor: 6%
- I don’t know: 6%

FURTHER INFORMATION
STANDARDS AND CERTIFICATES

The Nordex Group has implemented the following standards:

- Environmental Management ISO 14001
- Life Cycle Assessment ISO 14040/14044
- Occupational Health and Safety ISO 45001
- Energy and Management ISO 50001

MEMBERSHIPS AND ORGANIZATIONS

Nordex is a member of various international and sector-specific associations. We play an active role in the following organizations:

Furthermore, Nordex is a member of the Res4-Africa Foundation, an initiative that supports Africa's just energy transition to ensure access to affordable, reliable, sustainable, and modern energy for all.

1 Only Rostock, all other standards are Group-wide.
